SUMMARY

I am currently working as a **FrontEnd Developer** mainly in the **JavaScript framework ecosystem - Vue.js**.

The applications we maintain (and write new ones) are mainly based on **Nuxt.js** - the Vue.js framework supporting **Server-Side Rendering** and **Pre-Rendering**.

We also use the benefits of the framework for UI components - **Vuetify**.

Privately, I am educating further towards Full-Stack Developer in **Node.js** and I also get to know another JavaScript framework - **React with TypeScript**.
